- Lower Training Costs
- Broader User Adoption
- Less Application-Switching
- Higher Productivity
- A Faster ROI

## CRM SaaS Options

- Online Tours
- Proof of Concepts
- Short-Term Hosting
- Long-Term Hosting

Microsoft Dynamics CRM 3.0 is a powerful, easy to implement Customer Relationship Management solution that tightly integrates to Microsoft Outlook yet provides a range of deployment options for maximum flexibility. The tight integration with Microsoft Outlook translates into significant benefits versus other CRM solutions including:

- **Lower training costs**
- **Broader user adoption**
- **Less application-switching**
- **Higher productivity**
- **A faster ROI**

Users access the system directly through Microsoft Outlook or by using the CRM web interface through their web browser.

Microsoft CRM provides a choice between on demand and on-premise deployment so you can begin your implementation with Project Hosts and then move your system on-premise later when your IT department is ready to support the application internally or simply contract for on demand services with Project Hosts permanently. Our low, month-to-month pricing makes on demand Microsoft Dynamics CRM an affordable, flexible choice for rapidly implementing an on demand system.
